To: Council

Subject: [External] CTS in Favour

To the City Council, I have been long in favour of this but after hearing Scott Hamilton today on CBC I am more convinced that our city can benefit from the CTS.

I have always been very proud of my city because I think we try to be a home to many different walks of life. Our community has been very kind to me when trying to reach out and do something special in our city. I hope we can find kindness to help those who need this facility.
