Good morning.

I am very sorry but I was just given a work commitment that will have me in Burlington this evening. I apologize for the short notice but it was u avoidable. It is my hope that council will take my community's concerns about traffic safety seriously. Speed signs are not enough. Cars a speeding past them daily.

I would appreciate the council's consideration of either season speed bumps (on Arthur Fach between Can Amera and Coulthard and at Baggs Crescent and Arthur Fach) or raised intersections at these and other locations throughout the Upper Country Club community. Young people with low-riding cars are being reckless as they speed through the neighborhood. Speed bumps and/or raised intersections would force them to slow down. I would hate to see a child or anyone for that matter, suffer injuries nor perish because some careless driver didn't respect the speed limits. I have spoken with my neighbour, a transportation technologist, who explained the benefits of both speed restricting options.

We need more by-law officers desperately (for a wide range of reasons). I love our community. However, there has been a steady decline in both the safety and appearance of UCC. This must change. The addition of the park was nice, however, it's not enough. Our property taxes are high enough that things like safety should be forefront in any budgetary discussions.

Again, I apologize for being unable to attend this meeting this evening. I hope a swift and safe decision can be made that the all the residents in the UCC can be proud of their community.

Smile! It makes people wonder what you're thinking!
