Subject: [External] Re kenley lane walkway

Without prejudice

I would ask council to support the motion to repair the wall in the walkway with modern engineering accepted practices .this is the least cost and continued community access that has been available for 3 generations of residents

I have owned property in summer place for 39 yrs and lived 36 yrs The agreement that the community had with the city 30+ Yrs ago for the closing of Southgate off summer place and create another lot to build a home All year round walk way was to be built with modern engineering standards and year round maintenance what we got was a poor engineered cow path. And now without any discussion it closed for the winter a total tragedy for the residents , students , dog walkers in the neighborhood from cedar st to Salisbury ...

The new city staff doesn't respect previous agreements

Please do the right decision that residents deserve Carl Furtado
